

Abstract

In a pixel defect correct method, a refractive index
varying area which is different in refractive index from the
surroundings thereof in a plane parallel to an image display
5 face is equipped on a defective pixel of the image display face
and thereby light is scattered from the refractive index varying
area, and the defective pixels of the image display are made
inconspicuous. In a color mura correcting method, a color mura
film is equipped to an image display portion of an image display
10 device, the complementary color of the color mura is generated
in the color mura correcting film in connection with the color
mura of the display image, and thereby the color mura of the
display device is made inconspicuous.
